

Mt Stromlo

Our story so far.

meet **pat**.[®]

A thirst for water.

Recreational activities are for enjoying life, getting fresh air, exercising and living in the moment.

Constantly buzzing with activity, the park is Australia's premier multi-use recreational sporting facility. It is situated in the heart of the Molonglo Valley in the nation's capital, Canberra.

Our mission for the mountain.

ACT Venues and Australian National University granted permission for Meet PAT to install water stations in two locations on the mountain.

By providing water stations at the park, Meet PAT is helping to improve the facilities as well as encouraging users to fill up their own reusable bottles.

This project also allowed us to proudly showcase Meet PAT products. The company's founders both have a unique tie to Canberra, having both studied and/or grown up in the ACT.

When and where.

The two water stations were installed in late 2016 and 2017.

The first is located at the main entrance point to the mountain bike trails. Then a second at the top of the mountain, near the Mt Stromlo Observatory.

The data.

We reviewed usage captured
between Nov 2016 - Nov 2021

307,919

number of users

1,170 average users per week

126,559

total litres of water used

with 482 average litres used per week

The impact.

When compared to purchasing the equivalent 600ml single use bottled water or sugary drink.

20,957 kg

CO2 Emissions saved

210,933

Bottles saved from landfill

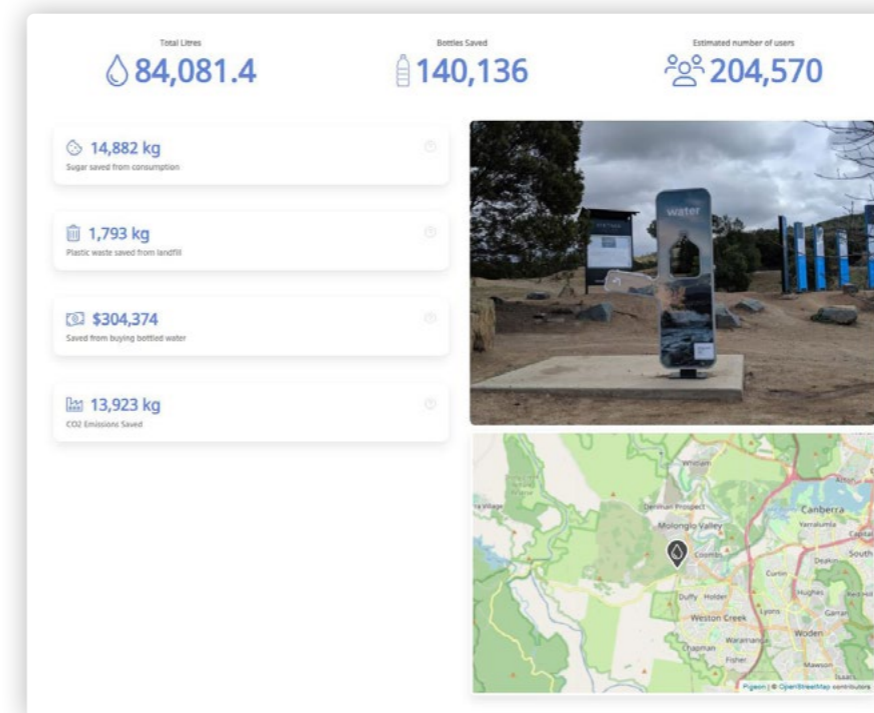

22,401 kg

Sugar saved from consumption

How do we know?

The water stations installed at Mount Stromlo, along with all Meet PAT permanent products are fitted with a LoRaWAN smart sensor.

These sensors provide live data, which is linked and captured by our online proprietary data management system.

LoRaWAN™ is a long range, low-power wireless network. This technology is all about connecting a product such as a water station to the Internet easily.

Let's meet.

Our water stations can be found across Australia and the world in cities, schools, parks and stadiums delivering touch-free, safe and sustainable drinking water for communities.
